GIS Core Administration

Course details

Duration: 1 day

Cost: \$760 (ex gst)

To register email: training@catalyst.net.nz

About the course

Catalyst GIS Core is a spatial data platform designed for stability, reliability and ease of use. It is used to store, publish and analyse spatial data with both web and desktop tools.

This course is a hands-on introduction to the administration of a GIS Core deployment. You will learn about all components of GIS Core, how to upload and export data sets, how to publish, unpublish and secure data sets, and how to interact with GIS Core through web and desktop clients.

Course outline

- Introduction to GIS back-ends
- Introduction to geospatial web services
- User administration
- Uploading data sets
- Modifying data sets
- Styling data sets
- Creating, configuring & publishing maps
- Creating, configuring & publishing dashboards

Target audience

Users and administrators of Catalyst GIS Core

Prerequisites

A familiarity with GIS and web concepts
